von Neumann, John

★Fundamentos matemáticos de la mecánica cuántica. (Spanish. Spanish summary) [[Mathematical foundations of quantum mechanics]]

Translated from the 1932 German original by Ramón Ortiz Fornaguera. Second edition.

With an introduction by José Manuel Sánchez-Ron.

Textos Universitarios [University Texts], 9.

ISBN 84-00-07171-9

This is a translation by Ortiz Fornaguera from the famous German original published in 1932 [Springer, Berlin, 1932]. This is a classic book that has been translated into many languages. In this edition there is a 48-page introduction by Sánchez-Ron giving a biography of von Neumann, discussing the place of the book in the development of quantum mechanics and mathematics, and explaining the circumstances of the translation.
